

Adjustable stove legs assure that your stove will sit level no matter the surface

REAR 620 BROAD ST., BERWICK, PA 18603

SIMPLICITY • EFFICIENCY • QUALITY

## Introducing the Leisure Line Lil' Heater

Based on our Econo model and capable of 70,000 input btus, this small and attractive stove will provide supplementary heat for the average 2,000 sq. ft. home.

We developed this design for the prospective Anthracite Coal stoker stove owner who is looking for classic stove styling, yet prefers a smaller and more affordable way to heat their home. This pretty little stove shares the same robust and reliable feeder design, large ash pan, and powerful 265 cfm blower as our Pioneer model. Control of the stove is accomplished via the Coal-Trol™ “cruise control for stoves” by Automation Correct. The Coal-Trol™ will control the room where the thermostat is located within 1° F.

## **The Lil' Heater is Low Cost , Conveniently sized and Easy to Operate!**

**This small and reliable stove costs very little but really puts out the heat! With it's elegant legs and small size it will make an ideal addition to any home**

**Anthracite Coal will make your home cozy and warm more conveniently and for less money than any other solid fuel**

**Optional Power Vent and Hot Water Coil available**
