

# SUPER MAGNUM STOKER

# P43 PELLET STOVE

A long standing performer just got better! The proven Verti-flow coal feed system is the engine that drives the new Super Mag. All new styling makes the super mag a more appealing fit. The Super Mag features a large 110 lb. Hopper capacity, new ESP temperature control, adjustable leg height, and a filtered convection blower system with high output. For a basement installation, the Super Mag can have a duct pipe attached to distribute the heated air directly to the living space through a floor register.

- Fuel: Anthracite Rice Coal
- BTU: 5,000 to 104,000
- Hopper Capacity: 100lbs
- Flue Size: 6 inches
- Availability: August 2008

- Fuel: Wood Pellets
- BTU: 0 to 43,000
- Hopper Capacity: 50 lbs
- Flue Size: 3 inches
- Availability: August 2008

The P43 gives you all of the great, proven Harman features in a small versatile package. Automatic temperature control coupled with automatic ignition, means you can virtually set it and let it go. Newly designed heat shields give a unique look to the P43 and make it easier to fit into any décor. The P43 features a 50 lb. hopper capacity, with a 50lb hopper extension available. The burn rate is 0 to 43,000 Btu which means it is capable of heating an area up to around 1400 sq. ft. Plus, the P43 can be supplied by 100% outside air which means there is no effect on your valuable indoor air quality.

# HYDROFLEX60

NEW PRODUCTS 2008

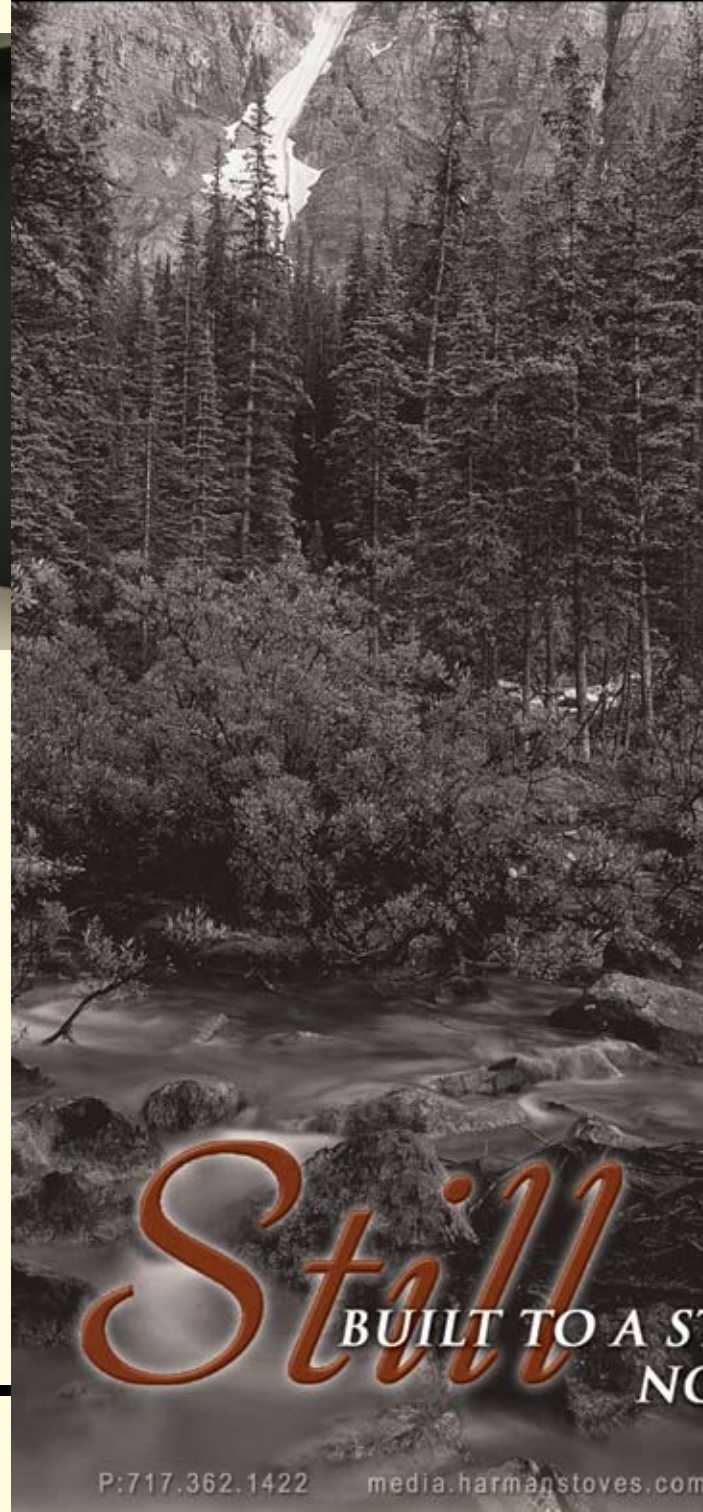

HARMAN

GREEN heating at it's best, the HydroFlex60 provides up to 60,000 Btu's to your existing central heating system. Whether you currently have a hot air system or a hot water system, the HydroFlex60 will save you on heating costs. With it's proven pellet burning system, triple pass heat exchanger and wireless thermostat, the HydroFlex60 will provide a warm, comfortable feeling in both your home and your pocketbook. The HydroFlex60 features a refractory-lined firebox, 14 stainless steel exhaust tubes, one full inch of closed cell foam insulation on the water jacket, and fiberglass insulation surrounding the entire unit. Using a 3" pellet exhaust and ¾" water lines, the HydroFlex60 makes installation simple and economical. Plus, the small footprint of the HydroFlex60 allows it to be installed in those tight places.

- Fuel: Wood Pellets
- BTU: 0 to 60,000
